A scenic view of a river with a pagoda on the bank. The pagoda is a traditional structure with a tiered roof, situated on a small island or bank in the middle of the river. The water is calm, reflecting the surrounding greenery and the sky. The background shows a hazy landscape with trees and a distant mountain range.

Research Interest

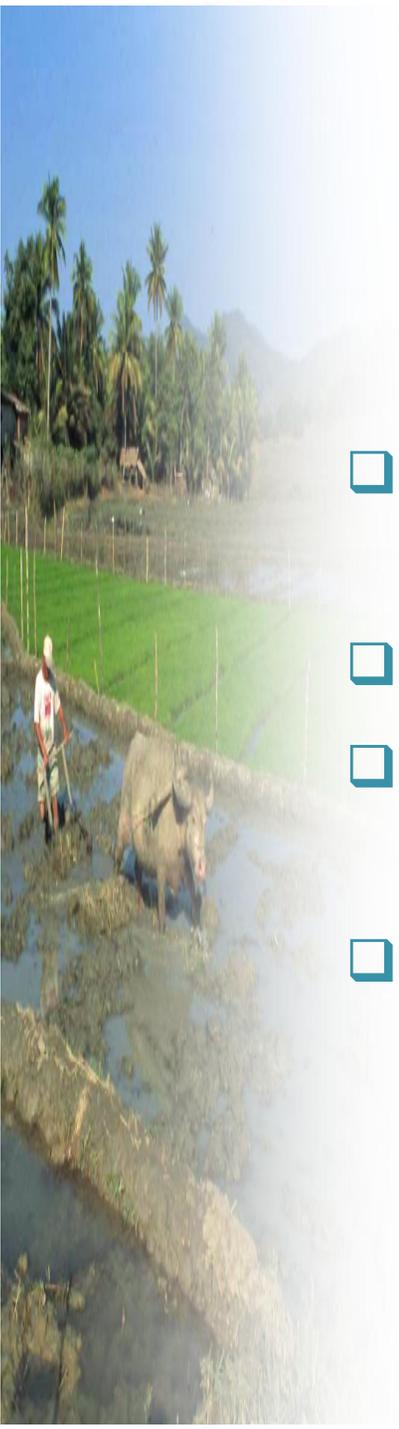

“Participation of Communities on Water Resources Management for Climate Change Adaptation”

Objectives:

- Study awareness and activities of communities on water using/management
- Study acknowledgement of people on climate change adaptation that related to water

Challenges/Barriers

- Water and climate change management is new issues
 - Lack of experience, data, funding,...
-

A photograph of a rural landscape. In the foreground, a person wearing a white shirt and a hat is standing in a shallow river, holding a long pole. A water buffalo is also in the water, partially submerged. The background shows a green field, a line of palm trees, and distant mountains under a clear blue sky.

Expectation from this Workshop

- ❑ Knowledge on cyberinfrastructure that can be applied for water resources management
 - ❑ Data sharing
 - ❑ Experiences and good-lesson learned from other counties
 - ❑ Regional and international coordination and cooperation mechanism
-
