

Networks for European, American, and African Research (NEAAR) Network Acceptable Use Policy

NEAAR is a joint collaboration between GEANT, the UbuntuNet Alliance, the Arab States Research and Education Network (ASREN), the West and Central African Research and Education Network (WACREN), as well as the South African National Research Network (SANReN) and the Tertiary Education and Research Network of South Africa (TENET). The primary goal of NEAAR is to provide high speed networking into and out of the African region.

NEAAR is a transit network and therefore has no end users directly connected. Access to NEAAR is via connected networks, peers, and partners. Data communication over the NEAAR network is governed by the acceptable use policies of the campus, service provider, or other end networks involved in the traffic. NEAAR will not peer with any purely commercial entity.
